## INFORMATION DISPLAY

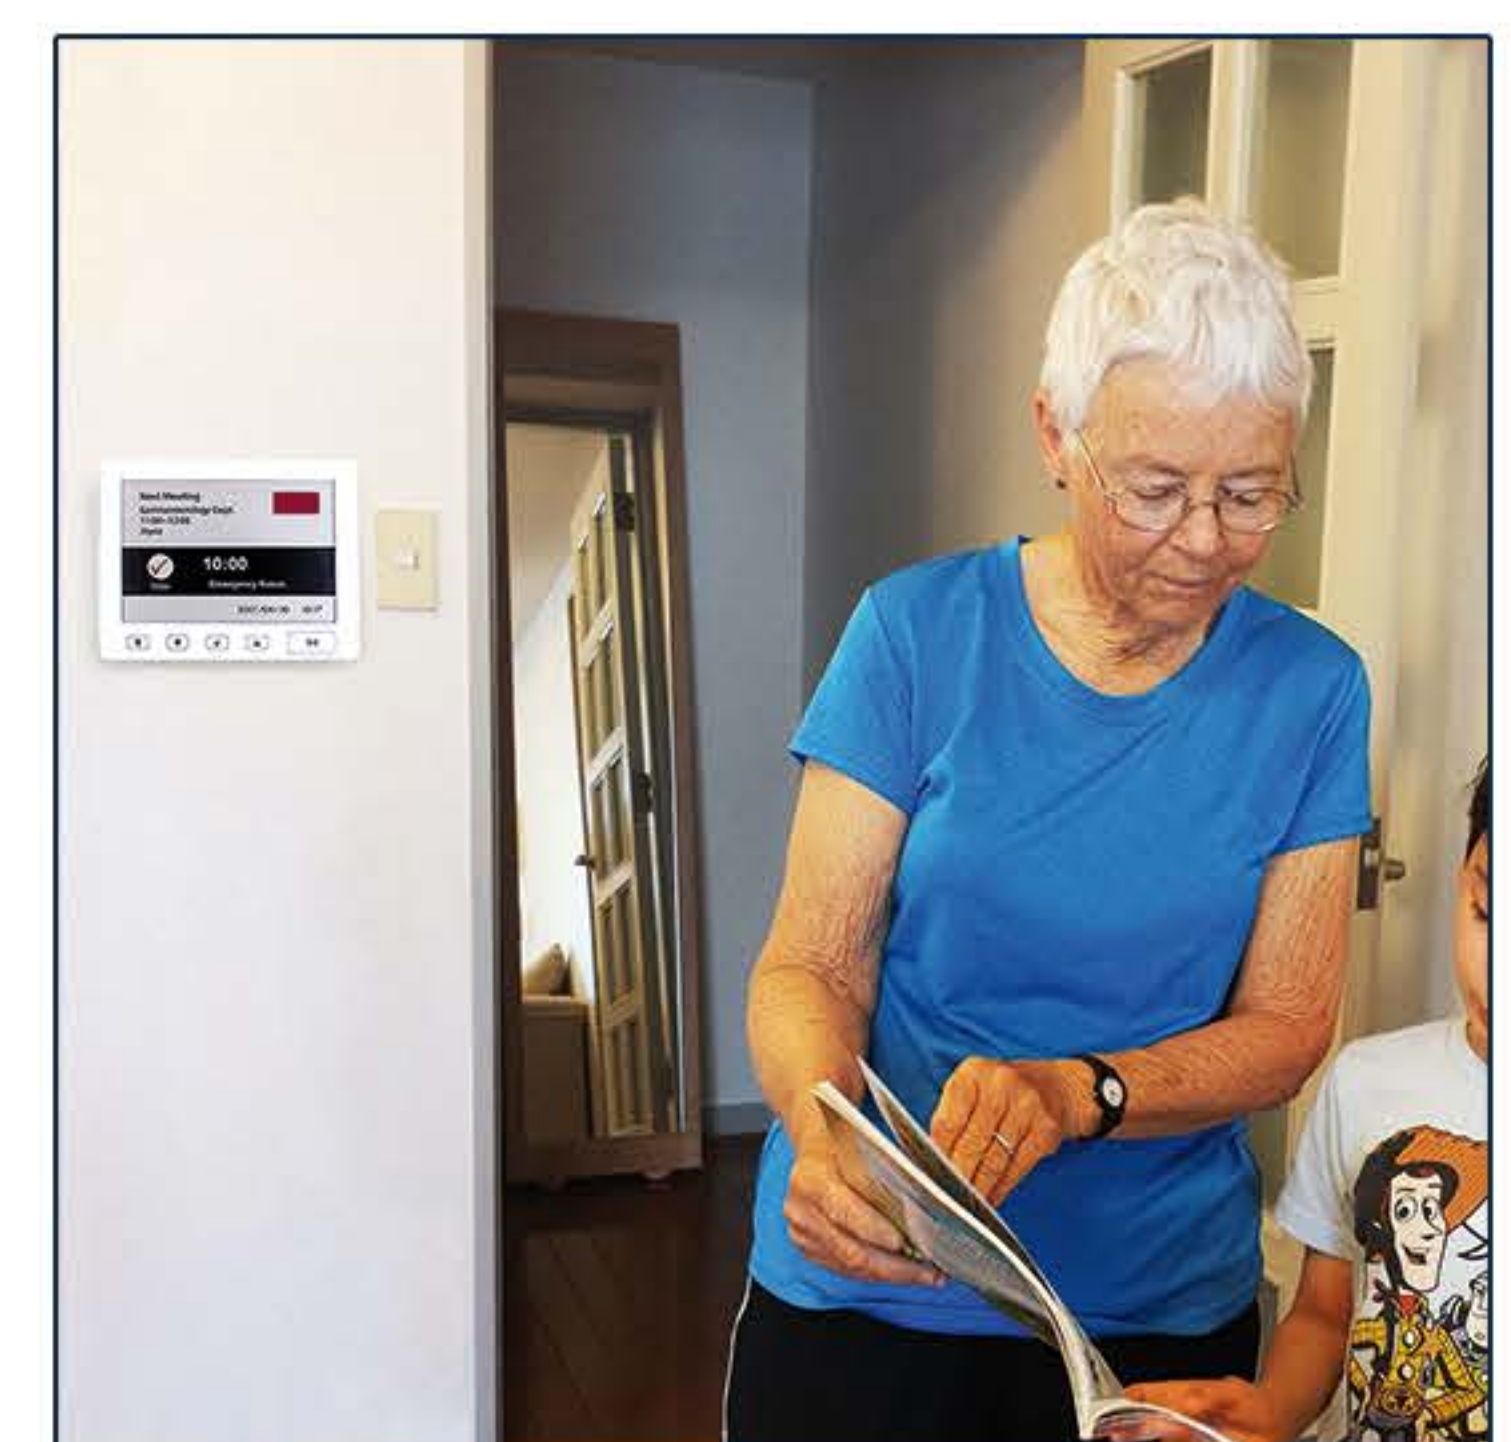

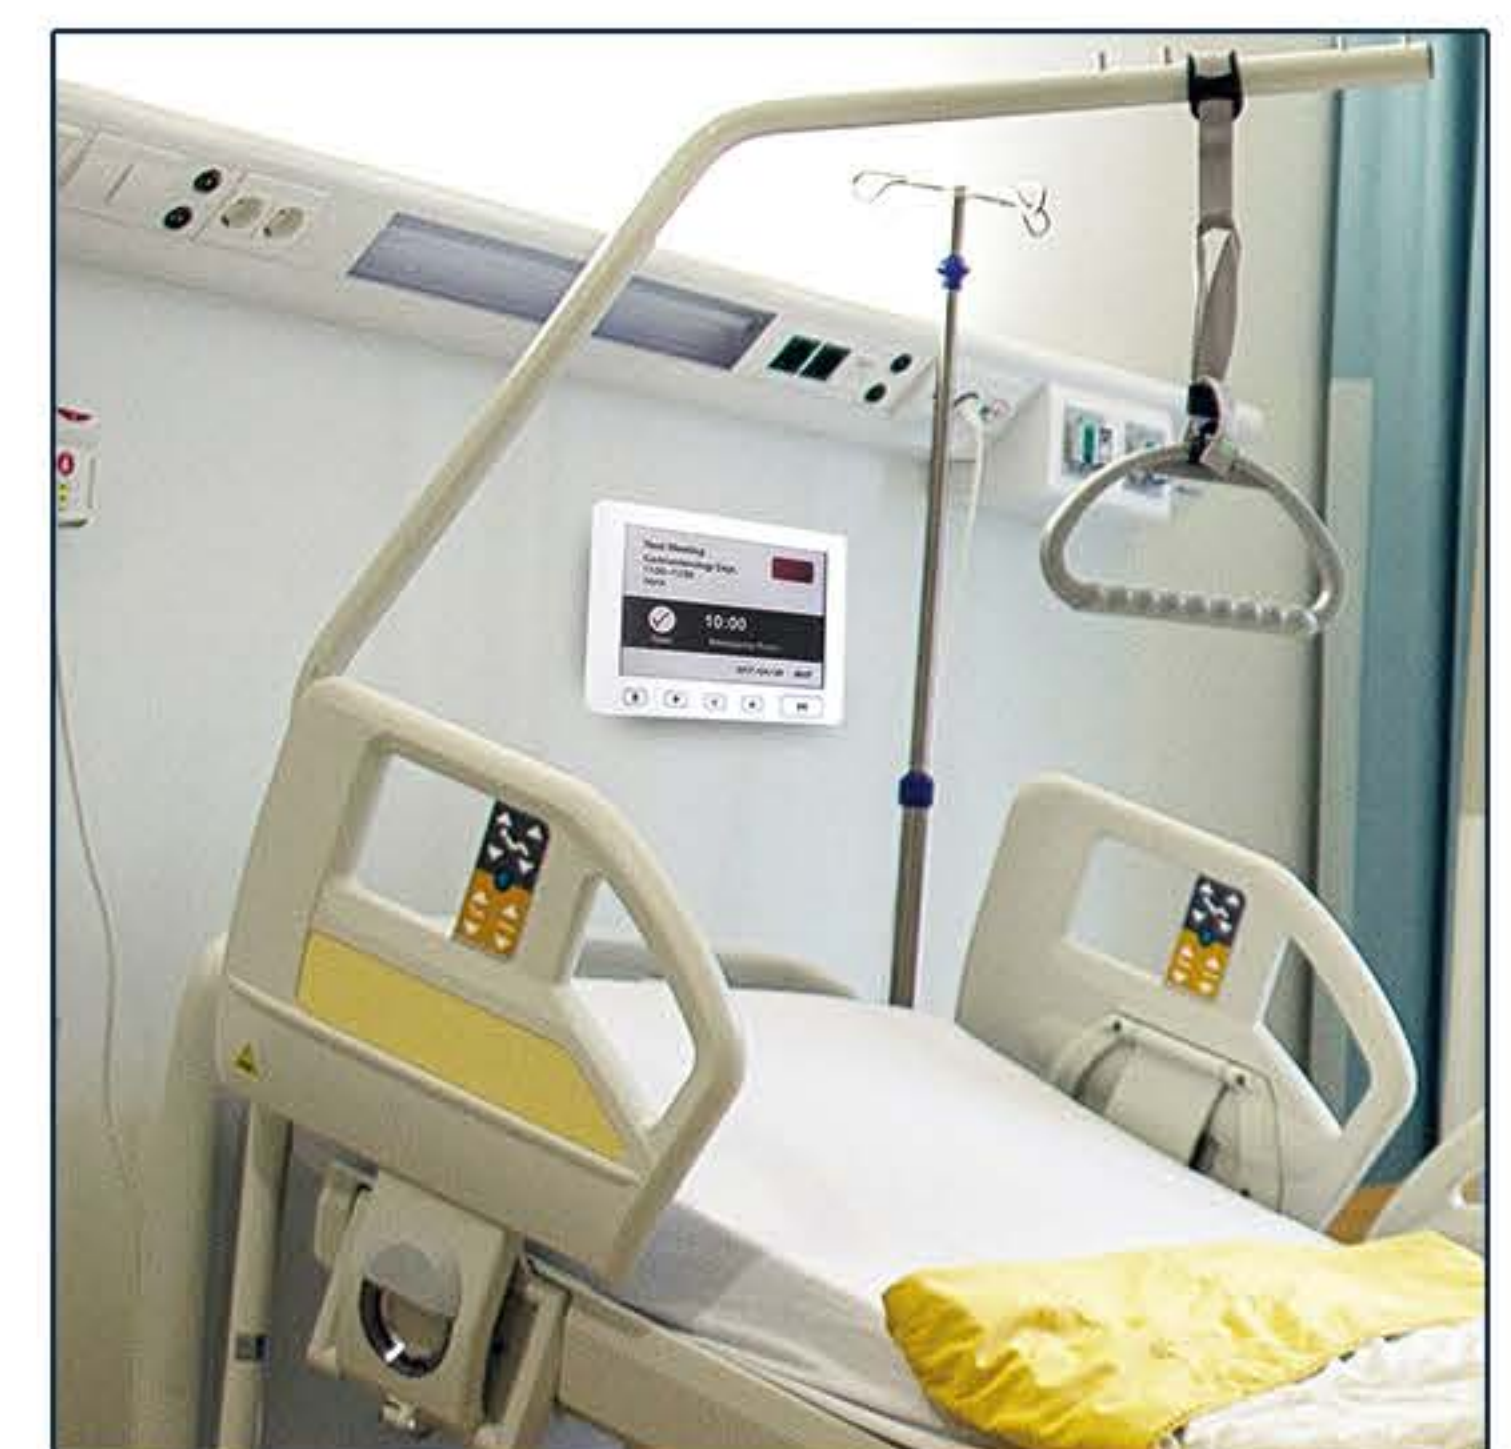

### EPD1300C

The TeamUC 13.3" EPD1300C is a low-powered, easy-to-read information display whose contents can easily be updated from a remote area such as a back office or a central location. Embedded with E Ink technology, its screen is gentle on the eyes and is easy-to-read even under direct sunlight. It is environment-friendly because it saves paper by not printing tags as well as business-friendly because labor isn't needed for manually changing them.

With the EPD1300C, health facilities now have the ability to display essential patient and client information that always stays on. The EPD1300C can be placed outside of the patient's room, allowing medical staff and families access to the most updated healthcare information. This allows patients and clients to sleep undisturbed which is vital to the recovery process. It also equipped with a call button for requests and emergency situations. To provide patients with the best medical care and long-term wellness, embrace the EPD1300C today.
