

## ELECTRONIC SHELF TAG 2.9-INCH / COLOR

## ELECTRONIC SHELF TAG

### ESL290C

The TeamUC 2.9" ESL290C is a low-powered, easy-to-read electronic shelf tag whose display can easily be updated from a remote area such as a back office or a central location. Embedded with E Ink technology, its screen is gentle on the eyes and is easy-to-read even under direct sunlight. The ESL290C is environment-friendly because it saves paper by not printing tags as well as business-friendly because labor isn't needed for manually changing them.

The ESL290C is perfectly suited for use in retail by giving businesses the ability to update pricing as often as they need, and to display promotions, inventory levels, and more. For those in the packaging and shipping industry, the ESL290C can be used to efficiently manage their inventories and transform their workspace into a Smart Warehouse. Usher in the future with this next generation tag.
